Who we are

Continuous improvement and innovation forms the core of our company and feeds our strategy on sustainable growth. DUBANG Roads and Environmental Solutions is a 100% black owner-managed company that trades in bitumen and asphalt based products and environmental products for the mining and agricultural industry.

Philosophy

We believe that well maintained infrastructure underpins quality of life and socio-economic development and, that such can only be achieved through collaborative efforts with like-minded stakeholders.

Vision

To become a partner of choice in the manufacturing of asphalt for asphalt based roads and pavement. A leader in the production of innovative asphalt based products and environmental products for the mining and agricultural sector.

What we do

Roads and pavements represent a major and critical investment in our economy, and at DUBANG, we see them as a basic infrastructural element in connecting our communities and economy at large. The attention a society pays to its transport interconnectedness is an indication of its growth intentions and in this DUBANG sees an opportunity to play, in communicating that intention.

Meaning

DUBANG the word, is derived from SeSotho meaning “mix together” but we prefer “bring together”, appropriate as we are not only bringing together markets and suppliers but also connecting communities and thus impacting on how goods and people are transported on the road.

We trade in asphalt-based products for maintenance of roads and pavements. We also implement asphalt based road surfacing projects of any size through our partners and trade in leading dust-control products for the mining and agricultural industries.

How we do it

Through our strategic partnership with a leading manufacturer in the asphalt industry we have identified innovative products that are cost-effective and environmentally friendly for the building and maintenance of urban and rural roads.

PROVISIONAL INFORMATION

DUBANG is a member of the
BATSOFSE GROUP OF COMPANIES.

Products & Services

ASPHALT ROAD SURFACING

With support of highly experienced paving crew and strategic partnerships with asphalt producers, we are able to lay asphalt in Gauteng and surrounding provinces at cost-effective prices

T.H.E **Rejuvenator**

The only asphalt based rejuvenator that is Agrément South Africa Certified. The Rejuvenator improves and extends the life-cycle of asphalt roads and pavement, postponing eventual rehabilitation of the road or asphalt based pavement.

SUPPRESS-IT

The name speaks for itself, a product geared for the mining, agricultural sector. The product suppresses and controls dust that is produced from mining and agricultural roads through hauled material.

Some of the benefits of Suppress-IT are:

- Prevents ingress of water
- Retards soil erosion
- Increases surface quality
- Increased remained service life, and
- Reduces depreciation on your roads

Polymer Modified Bitumen Stabilising Material PMBSM

Stabilisation is the means to improve the load bearing capacity of in-situ or imported materials for the use in base and sub-base construction. In an ideal situation this can be done without the need of importing material, therefore the need arises for modern technologies like PMBSM.

PMBSM is a combination of polymers, bitumen and surfactants and is applied using traditional stabilising methods. It is the stabilising product of choice for a variety of soils. Some of the benefits of PMBSM are:

- Increased base strength and durability
- Fast in application and curing, and
- Retards ingress of water

Concrete Product - Kerbs

DUBANG also trades in SABS approved kerbs for the construction industry, civil engineering industry and Municipalities in Gauteng and surrounding provinces. We currently trade in the conventional concrete kerbs, being Fig 3, 7, 8b and 8c and in 1000mm and 330mm size, respectively.

Partnerships

Enviroseal

Enviroseal is a subsidiary of Gauteng Asphalt with over 25 years of road product experience, ensuring professional and effective service. The Gauteng Asphalt Group of Companies, incorporating Roadseal, Tarspray, Enviroseal and Gauteng Asphalt, is one of Southern Africa's largest independent manufacturers, suppliers and applicators of asphalt and bitumen products. The company designs and manufactures all grades of road binders either in bulk or in drums and they can be stored on site for use as when needed.

Lefika Concrete Products

Lefika Concrete Products has 10 years of kerbing manufacturing experience and in those years perfected and matched international best practice in the manufacturing of concrete products. The company is a provider of SABS approved kerbs to the Municipalities, Construction and Civil Engineering Industry in the Vaal and greater parts of Gauteng and surrounding provinces.
